# Siddhi Manche

*UX/UI Designer | Front-end Developer*

(313) 414-4290● manche.siddhi@gmail.com ● https://siddhidesign.github.io/Portfolio/● https://www.linkedin.com/in/siddhi-manche-969820216/

## EDUCATION

***University of Michigan-Dearborn*** *Sept 2024 - May 2026*

Master of Science in **Human-Centered Design and Engineering (Specialization: User Experience Design), GPA: 3.56**

**Teaching Assistant** under Professor for course Foundation of HCDE *Sept 2024 – Present*

**Relevant Coursework:** HCI in UI/UX, Web Technology, Marketing Management, Human-Centered AI teaming

***University of Mumbai*** *Aug 2020 - June 2024*

Bachelor of Technology in **Electronics and Telecommunication Engineering (Specialization: AI/ML), GPA: 3.32**

Co-lead of Design Team in Google Developers Student Club, Volunteer Experience for IEEE-TENSYMP Asia-Pacific in IIT-Bombay

**Relevant Coursework**: Web Design, Project Management, Management in Information Systems, C, C++, Java

## EXPERIENCE

**UX/UI Design Intern** May *2025 – Aug 2025*

***FindMe*** New York, USA

- Designed **AI-driven portfolio templates** using **Figma and JavaScript automation scripts**, enabling personalized layouts from user form data that streamlined portfolio creation and enhanced design consistency for 500+ users.
- Conducted **usability and accessibility testing** with **60+ participants** using **NVDA, Miro, and moderated user testing**, improving navigation clarity and screen-reader compatibility scores by **35%**, resulting in smoother browsing for all users.
- **Partnered** with **frontend developers and AWS engineers** to implement **adaptive layouts** and validate **WCAG 2.1 AA compliance**, ensuring responsive behavior across web and mobile and boosting accessibility satisfaction rates.
- Translated **research insights and heuristic evaluation findings** into **visual hierarchy and content architecture enhancements**, reducing user task errors by **28%** and strengthening engagement with portfolio generation features.

**UX/UI Designer** *Oct 2023 - July 2024*

***JaiHind Groups*** Mumbai, India

- Architected internal inventory management workflow architecture and user interaction flows using **Figma, React, and Agile sprint frameworks**, reducing manual order processing time by **40%** and increasing accuracy for internal operations.
- Conducted **usability testing and data analysis** with **Google Analytics and heuristic evaluation** methods for 25+ internal users, improving dashboard navigation and visibility, which increased task completion rates by **35%** and reduced onboarding time.
- Engineered **real-time SQL and AWS integrations** to automate inventory synchronization and predictive reporting, enabling data-driven decisions and improving supply chain transparency across departments.

## PROJECTS

**GrocGenie – AI Food Inventory Management App** *Sept 2025- Dec 2025*

- Designed an **AI-driven inventory and recipe recommendation platform** using **Figma, Miro** to detect expiry, suggest recipes, and prevent waste; enhanced accessibility and task efficiency by **42%**, promoting sustainable consumption habits.

**IRS2GO Redesign** *Jan2025- April 2025*

- Re-architected the **IRS2Go portal** with an **accessibility-first, WCAG 2.1 AA–compliant framework**, performing **heuristic evaluations, user testing, and A/B validation** to streamline navigation and reduce cognitive load for low-vision users by **35%**, improving completion and trust rates.

**LLM-Powered UX Research: Optimizing the EV Charging Experience** *Jan 2025- April 2025*

- **Combined LLM-powered thematic analysis of 16,000+ EV charging reviews with interviews**, supported by statistical analysis (ANOVA, t-test), to identify six key experience themes across Tesla and non-Tesla networks, delivering a service design roadmap projected to reduce reliability complaints and increase user trust.

**Reducing Outpatient Anxiety – Research Project** *Sept 2024- Dec 2024*

- Led **mixed-method user research** using **interviews and diary studies** (800+ data lines analyzed in Excel and NVivo) to uncover emotional triggers in outpatient care; proposed a **digital toolkit and VR prototype** that reduced patient anxiety indicators by **40%** during pilot testing, improving perceived care experience.

## SKILLS

***Product-focused Skills***: Product Strategy, User Journey Mapping, A/B Testing, Stakeholder Management, Agile Methodology, Lean UX, Interaction Design, Inclusive Design Practices, Product Design, Typography, UI design.

***Research & Data Analysis:*** Qualitative Research, Quantitative Research, Card Sorting, Eye-tracking, Google Analytics, User-Centered Design (UCD).

***Visual Design & Tools:*** Design Systems, Figma Make, Adobe Firefly, Responsive Web Design, Wireframing, Prototyping, Motion Design, Sketching, Figma HTML5, CSS, Tailwind CSS, JavaScript, React Js, Dart, Kotlin, DevOps, Angular, VueJs, Adobe XD, Photoshop, llustrator, Microsoft Office, Visual SC, Sketch, Miro, Adobe Creative Suite, InDesign, Storybook

## CERTIFICATE

- Google UX Design Professional Certificate (7 courses)
- Data Visualization with Power BI (Great Learning)
